EDUCATION

-
- **TKR College of Engineering and Technology** Hyderabad, India
Bachelor of Technology - Electronics and Communication Engineering; GPA: 8.0 Nov 2022 - May 2026

SKILLS SUMMARY

-
- **Languages:** Python, JAVA
 - **Soft Skills:** Leadership, Event Management, Public Speaking, Time Management

PROJECTS

-
- **Auto Intensity Control Of Street Lights using Arduino:** The goal is to create energy-saving streetlights & When there is no movement on the road, it will become dim, The lights will turn when the vehicle is detected saving power consumption, Implemented on standard street lights . Arduino micro controller, cameras and sensors These devices can detect movement and enable dynamic lighting and dimming (July 2024)
 - **Automatic plant Irrigation system with Dry/Wet soil sense:** An Automated plant irrigation system utilizes soil moisture sensors to determine if watering is needed and then automatically adjusts the water levels in the field using a water pump. Maintain optimal soil moisture levels for plant health by automating the watering process based on real-time soil conditions. Reducing human intervention and Water waste. Arduino Micro controller, Pump, Electrodes, Step down Transformer. (May 2025)

CERTIFICATES

-
- IBM Skill Build Certification
 - Drone Technology Workshop by EPIT Research labs PVT.LTD.

EXPERIENCE

-
- **CENTIFIC** Hyderabad, India
Offline technical & soft-skills Internship at Centific April 2025 - June 2025
