Career Summary

I am an Electronics and Communication Engineering student with a strong focus on Machine Learning, Artificial Intelligence, and Data Analytics. I have hands-on experience in building scalable data solutions using Python and Hugging Face. My expertise includes developing interactive systems, working with large datasets, and optimizing data pipelines for actionable insights. Skilled in database management with MySQL, I am passionate about continuous learning and excited to contribute to innovative AI-driven projects.

Education

Vignana Bharathi Institute of Technology *B.Tech in ECE, 2025*
CGPA: 6.19

Sri Gayatri Junior College *MPC, 2021*
Percentage: 73.8%

Neo English World School *SSC, 2019*
Percentage: 87%

Technical Skills

Data Visualization: Tableau, Excel, power bi

Database Management: MySQL

Programming: Python, java, R, SQL

Others: Data structures and algorithms

Experience

Currently working as an AI/ML Data Annotation & Search Evaluation Intern at **Centific**, where I have contributed to two key projects aimed at improving AI systems. In the first project, I evaluated the quality of video-caption pairs by watching short videos and rating captions as good, acceptable, or bad based on relevance and accuracy. In the second project, I assessed the relevance and intent match of search engine results to help enhance algorithm performance.

Project Work

A Missile Detection and Auto Destruction System Using GSM

- Implemented object detection using ultrasonic radar and automated targeting via motor-driven firing mechanisms.
- Integrated GSM module to transmit real-time SMS alerts for remote monitoring and control.
- Enhanced efficiency by reducing human intervention and improving operational security.
- Gained experience in sensor interfacing, microcontroller programming, and IoT-based communication.

BCG GenAI Job Simulation (Forage) – August 2025

- Completed a job simulation for BCG's GenAI Consulting team involving AI-powered financial chatbot development.
- Integrated and interpreted financial data from 10-K and 10-Q reports using rule-based logic.
- Built a chatbot to deliver user-friendly financial insights and analysis.

Commonwealth Bank Introduction to Data Science Job Simulation (Forage) – April 2025

- Completed a job simulation demonstrating data management skills for Commonwealth Bank's Data Science team.
- Created data engineering pipelines to extract and aggregate valuable insights.
- Ensured data privacy compliance through anonymization and structured database design.
- Proposed data-driven social media analysis approaches and improved decision-making efficiency.

Certifications
